Can play a factor

How you access the Internet can play a big part.

It's a very complicate issue. And if you are ever interesting in testing this sort of stuff doing surveys, trying to figure out where does this digital divide really step from, it is incredibly challenging, all this you have to control for so many different variable. To test an specific variable is very difficult. Is the person age, gende, you have to make lots and lots studies to widon this down, and even that, we are not going to find the cause, we will be able to identify general trends.

The price os the computer has dropped significantly, there are things

Computers are penetrating where people can , doesn't solve but help

Mobile computer of all kinds has become very popular in the last years

The initial costs are lower. In some markets you have some choices

How big telecoms companies use smart phones to create a new digital divide

The article was very well written, very well researched. The personally, completely impersonally, it's immoral, amoral

Net neutrality: asp a is not able to block. If you assessing by a broadband company, unfiltered
